**Jamezz Mobile ordering through an easy and convenient web platform**

Let your guests order by themselves by mobile phone, website, tablet or kiosk. And make sure everyone always has the opportunity to order some more drinks or bites. No more searching for a waiter in a busy restaurant, Jamezz is always at your service.

Your IT Companion

Get to know Van Hessen's preferred partner

Let your guests order by themselves by mobile phone, website, tablet or kiosk. And make sure everyone always has the opportunity to order some more drinks or bites. No more searching for a waiter in a busy restaurant, Jamezz is always at your service.

This user-friendly platform can be fully managed and integrated with your current POS-devices. And at Van Hessen we customize Jamezz according to your wishes. Meanwhile you cut labor costs and save time. Easy to setup, operate and maintain.

Jamezz also arranges your pick-up and delivery with a customized website without any commission. Jamezz just charges you a monthly fee, no matter how many transactions are made. Jamezz is your digital waiter. At your service!
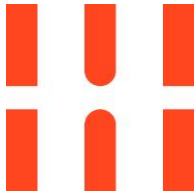

A fully integrated system

We integrate Jamezz with your Simphony or RES 3700 POS system. This way you don't need to invest in extra printers or other soft- or hardware.

By sending the order directly into your POS, no additional handling of checks and orders is required. Your POS takes care of printer or kitchen display routing and full reporting. Since Van Hessen has fully embraced Jamezz as a preferred partner both installation and support will be handled by us directly.

And, of course, you can count on the Van Hessen Support if have any queries.

- Fully integrated with your Oracle MICROS POS system
- No additional hardware
- No downloads
- User friendly
- Printed orders and kitchen display functionality as if it was booked on your POS
- Orders are processed in your POS automatically
- Ample reporting
- One IT-partner
- No commission, but fixed monthly rate
